AUTHORS' BIODATA

Ahmad Izuddin Zainal Abidin is a lecturer at the Department of Computer and Information Sciences, Universiti Teknologi PETRONAS and a member of Internet of Things in Agriculture (AIoT) research group at the Institute of Transport Infrastructure at the same university. He is involved in teaching and research activities in the Visualization cluster. He has published and presented his work in journals and local and international conferences. He has taught data mining and knowledge discovery, data science and few programming courses such as fundamentals of programming, structured programming, data structure and algorithm, object-oriented programming and web application development.

Emelia Akashah P Akhir is a lecturer at the Computer and Information Sciences Department and also attached to Centre for Research in Data Science (CeRDaS), Universiti Teknologi PETRONAS, Malaysia. She graduated from University of Brighton, UK with a PhD in Computing. She also an alumnus of University of Surrey, UK where she obtained her MSc in Information System. Prior to that, she holds her Diploma and First-Class BSc (Hons) in Computer Science. Dr. Amelia research interest mainly includes but not limited to Data Management, Information and Business Alignment, Data Governance, Data Quality and Information System. She is also currently involved in data quality and data science research. Dr Amelia is a member for UK Association of Information Systems (UKAIS).

Izzatdin Abdul Aziz is an Associate Professor and Head at the Centre for Research in Data Science (CeRDaS) in Universiti Teknologi PETRONAS (UTP), where he focuses on solving complex upstream oil and gas (O&G) industry problems from the viewpoint of computer science. He obtained his PhD in Information Technology from Deakin University, Australia working in the domain of hydrocarbon exploration. Prior to his PhD, he earned his Master's degree in Information Technology specializing in Computer Networks from the University of Sydney, Australia. Dr Izzatdin has secured and delivered numerous computing-related O&G projects mainly relating to seismic data processing and implementation of workflows for processing hydrocarbon exploration dataset on cloud-based systems. He is working closely with O&G companies in delivering solutions for complex problems such as Offshore O&G pipeline corrosion rate prediction, O&G pipeline corrosion detection, securing data on clouds and designing and implementing Metocean prediction system. Additionally, he is also working on Big data transmission, security and optimization problems on High-performance Computing Clusters. His research is funded by the Petroleum Research Fund, PETRONAS and The Malaysian Ministry of Higher Education.

Jafreezal Jaafar is an Associate Professor and Dean at the Faculty of Science and Information Technology at Universiti Teknologi PETRONAS (UTP), Malaysia. He holds a PhD from University of Edinburgh, UK (2009), MAppSc in IT from RMIT University, Australia (2002) and BSc in Computer Science from Universiti Teknologi Malaysia (1998). He joined Department of Computer and Information Sciences, UTP since 1999, where he was a former Head (2012-2016). His main research areas are AI, Machine Learning and Data Analytics, with over 100 technical publications. Currently, Dr Jafreezal is also attached to Centre for Research in Data Science (CeRDaS), which focuses on the implementation of AI and Machine Learning in the oil and gas industry. He is also active in conducting professional training in AI and Big Data Analytics for public and industry sector. Based on his vast experience and expertise, he had become the member of Academy Science Malaysia SIG in Machine Learning, executive member for IEEE Computer Society Malaysia Chapter (2016-2018) and executive member for MyAIS (2017-2019).

Junzo Watada is a Research Professor of Research Institute of Quantitative Economics, Zhejiang Gongshang University, China and Professor Emeritus, Waseda University, Tokyo, Japan. He contributed as a Professor to Department of Computer and Information Sciences, Universiti Teknologi PETRONAS, Seri Iskandar, Malaysia till 2020, after retiring Waseda University in 2016. He received his BSc and MSc degrees in Electrical Engineering from Osaka City University, Japan, in 1970 and 1972, respectively and his PhD degree from Osaka Prefecture University, Japan in 1983. He received various awards including the Henri Coanda Medal Award from Inventico in Romania in 2002, a Life Fellow of the Japan Society for Fuzzy Theory and intelligent informatics (SOFT). He is an IEEE senior member, Executive Chair of ISME as well as WCICME, currently the President and life member, Forum of Interdisciplinary Mathematics, an international society based in India. Dr Junzo published about 250 journal papers and published more than reviewed 900 articles, including international conferences and book chapters.

Jianxiong Yang received the BS degree in Computer Science from Sichuan University in 2002 and received the MS degree in Information, Production and Systems from Waseda University in 2008, respectively. In 2019, he received the PhD degree in Commerce from Kindai University, Osaka, Japan. Currently, Dr Jianxiong is CTO of Sichuan Huiwuxian Information Technology Co., Ltd.

Maryam Zaffar completed her PhD degree from UTP Malaysia in 2019, and she has over 13 years of teaching experience. Her research focuses on learning analytics, Data Mining, E-learning, and IoT. Dr Maryam currently serving as an Assistant Professor at University of Lahore, Islamabad Pakistan.

Manzoor Ahmed Hashmani received a PhD degree in Communication Networks from Nara Advanced Institute of Science and Technology (NAIST), Japan. He is currently an Associate Professor at the Department of Computer and Information Sciences, Universiti Teknologi PETRONAS (UTP), Malaysia. Dr Manzoor's research interests include Artificial Intelligence, Machine Learning, Blockchain Technology, and Communication Networks.

Mohd Fadzil Hassan is an alumnus of the Malay College Kuala Kangsar (MCKK) and graduated in 1999 from the Colorado State University, USA with a BSc (cum-laude) in Computer Information Systems. He obtained his MSc in Artificial Intelligence in 2001 and PhD in Informatics in 2007 from the University of Edinburgh, UK. He was the former Dean, Centre for Graduate Studies, Universiti Teknologi PETRONAS (UTP) and currently an Associate Professor and the Director, Institute of Autonomous Systems, UTP. His research interests are in the area of Artificial Intelligence, Multi-Agent Systems and Service Oriented Architecture (SOA). He is actively involved in research works focusing on these areas. He has secured numerous research grants as a principal investigator, namely FRGS, ERGS, PRGS, and Technofund from the Malaysian government. Dr Mohd Fadzil is also actively involved with international collaborative research works particularly with universities from the Middle East, Korea, and ASEAN region. He has engaged in authoring more than 100 indexed publications. He is a senior member of IEEE and was an executive committee for the IEEE Computer Society Malaysia in 2018.

Mohd Hilmi Hasan is a Senior Lecturer at the Computer and Information Sciences Department, and researcher at the Centre for Research in Data Science (CeRDaS) in Universiti Teknologi PETRONAS (UTP), Malaysia. He obtained his PhD in Information Technology from UTP in 2017 with a research in the area of artificial intelligence, specifically Interval Type-2 fuzzy. He also graduated with Master of Information Technology (eScience) from The Australian National University in 2004 and Bachelor of Technology (Hons.) Information Technology from UTP in 2002. Dr Mohd Himi has been teaching and being an active researcher at UTP since 2004, in which his research interest covers the areas of artificial intelligence and data analytics. He has involved in many research projects awarded by the government agencies and industry that are related to data analytics, data engineering and predictive modelling.

Norshakirah Abdul Aziz is a Senior Lecturer at the Computer and Information Sciences Department at Universiti Teknologi PETRONAS, Malaysia. Currently, she is a researcher at the UTP Centre of Research in Data Sciences (CeRDaS) and Data Governance Leader at High-Performance Cloud Computing Data Centre (HPCCC). Dr Norshakirah holds a Diploma in Management Technology, Bachelor's Degree in Information Technology (IT), MSc Degree in IT, and a PhD in e-SCM Integration & Collaboration. Also, she has a total of 16 years of experience gained from academic institutions and industry under her belt. Her industry working experience is related to Business Intelligence, E-Business, and IT Project Management. Her research scope covers Business Intelligence, Data Analytics, Data Governance, and Digital Addiction. Besides, she also a qualified Technologist Specialist (Ts), HRDF Certified Trainer, and a present EXCO Committee Member for Data Science Association, Malaysia.

Noor Hafila Syifaa Mohd Hatta completed her Bachelor's degree from UTP in 2018. She did a final year project in data analytics, focusing on the real use case of data management in a local car manufacturing company. She is currently working at an international brand company as Windows Analyst.

Nurfarahani Mohd Sani was a former Bachelor of Information Systems (Hons.) at Universiti Teknologi PETRONAS. Her research interest is in the data analytics domain, whereby she studied various kinds of applications with regards to the field. In her final year project, she investigated the application of clustering and classification techniques in analyzing students' employability.

Razulaimi Razali is a Senior Lecturer at Faculty of Computing at Universiti Malaysia Pahang, Malaysia. He holds a PhD from Universiti Teknologi Petronas, Malaysia (2018), M.Sc. in IT from Universiti Teknologi MARA, Malaysia (2004) and B.Sc. in Computer Science from Universiti Teknologi Malaysia (1998). He joined Department of Computer Science, UiTM since 2002. His main research areas are AI, Data Analytics and Wireless Sensor Network. Currently, Dr Razulaimi is also active in researching AI, Big Data Analytics and Wireless Sensor Network involving industry.

Savita K. Sugathan is an academic staff in the Department of Computer and Information Sciences, Universiti Teknologi PETRONAS (UTP), Malaysia since 2006. She received her PhD in Information Technology from UTP in 2018 and her MSc in Technology Management from University of New Wales, Sydney, Australia in 2006. She is accredited by Malaysia Board of Technologies (MBOT) as Professional Technologist (Ts.) in Information and Computing Technology. In 2019, Dr Savita was awarded Certified Professional in Requirements Engineering and Licensed Practitioner in Neuro-Linguistic Programming. Dr Savita is an active member of the Association of Information Systems (AIS) and a former member of the Information System Audit and Control Association (ISACA). In UTP, she is a research member for Positive Computing and Centre for Research in Data Sciences (CeRDaS). Her research interests are on the Adoption and Impact of Technology Advancements (Digital Transformation, Digital Marketing, E-Waste Management, Big Data Analytics, Internet-of-Things) towards 21st Century Education, Environmental & Economic Sustainability as well as Human Well-Being.

Said Jadid Abdulkadir received the B.Sc. degree in computer science from Moi University, the M.Sc. degree in computer science from Universiti Teknologi Malaysia, and the PhD degree in information technology from Universiti Teknologi PETRONAS. He is currently a Senior Lecturer with the Department of Computer and Information Sciences, Universiti Teknologi PETRONAS. His current research interests include supervised machine learning and predictive and streaming analytics. Dr Said Jadid is currently serving as a Journal Reviewer of Artificial Intelligence Review, IEEE ACCESS, and Knowledge-Based Systems.

Sameer Ahmad Khan received his MSc. in Computer Applications from University of Kashmir. He earned his PhD degree at Universiti Teknologi PETRONAS, Malaysia in 2018 and currently a Postdoctoral Research Fellow. He is working in collaboration with Spain, Sweden, on several scientific topic's projects. Dr Sameer is also contributing as a reviewer of renowned journals and international conferences and technical program committee member. His research interests include artificial intelligence, deep learning, computer vision and genomic analysis.

Saddaf Rubab received the MSc in Computer Software Computer Engineering from CEME, National University of Science & Technology, Pakistan in 2012. She has also worked there on different academia positions from 2009 to 2013. She earned her PhD degree at Universiti Teknologi PETRONAS, Malaysia in 2018. She is currently an assistant professor at National University of Science & Technology, Pakistan. She has received several research grants for ICT related projects from various research funding authorities and working on scientific projects in Australia, Russia, UK, Malaysia, and Pakistan. Dr Saddaf is also contributing as a reviewer of renowned journals and international conferences, technical program committee member and keynote/invited speaker. Her research interests include artificial intelligence, cloud computing, IoT's and cybersecurity.

Saurabh Shukla earned his PhD degree at Universiti Teknologi PETRONAS, Malaysia in 2020. He has done his MSc from Indian Institute of Information Technology, Allahabad (IIITA), India and completed his bachelors from Dr Abdul Kalam Technical University (AKTU), Lucknow, India. Dr Saurabh's research interests are the Internet of Things, cloud computing, fog computing, machine learning, Communications (Networks), Algorithms and Artificial Intelligence.

Shakirah Mohd Taib is a Lecturer and Researcher at Centre for Research in Data Science (CeRDaS) in Universiti Teknologi PETRONAS (UTP), Malaysia. She obtained a Bachelor Degree in Information Technology from Universiti Utara Malaysia and Master of Computing from University of Tasmania, Australia. She has more than 10 years of working experience in Universiti Teknologi Petronas (UTP). Her area of specialization includes knowledge discovery and data mining, knowledge technology and information retrieval using Artificial Intelligence techniques. Shakirah is a member of an international organization such as IEEE, IAENG and MyAIS.

Syarifah Bahiyah Rahayu Syed Mansoor is a Research Fellow of Cyber Security Centre, National Defense University of Malaysia. She has vast experience in the IT industry and academia. Dr Syarifah Bahiyah's research interests include (but not limited to) blockchain, artificial intelligence, and information science.

Wan Isni Sofiah Wan Din is a Senior Lecturer at the Faculty of Computer Systems & Software Engineering, Universiti Malaysia Pahang. She holds a PhD in Information Technology & Quantitative Sciences, Master in Computer Science and Networking and her first degree in Data Communication & Networking all from Universiti Teknologi MARA Shah Alam, Malaysia. Her fields of research interest are Data Communication & Networking, Network Design & Algorithm, Wireless Sensor Network, Clustering and Fuzzy Logic. Her main research area is in Wireless Sensor Network focusing on cluster head selection for energy efficiency using Fuzzy Logic. Currently, she is focusing research on Drone Technology. Dr Wan Isni has contributed as the principal author for the scientific articles in the field of interest.

Yukio Kodono finished the doctoral course of engineering faculty at Graduate School of Osaka Institute of Technology and received a PhD in 1992. After he worked for Fukuyama University, he joined the Faculty of Management Informatics at Osaka International University (OIU) as an Associate Professor in 2001 and promoted to a Professor in 2005. From 2007 to 2014 he was appointed to become Dean of Management Informatics, OIU and Dean of Graduate School of Management Informatics, OIU. From 2008 to 2014 he was appointed to become Dean of Business, OIU. Since 2015 he joined the Faculty of Business Administration at Kindai University as a Professor. Currently, he is Dean of Graduate School of Commerce, Kindai University from 2016. Dr Yukio has written more than 20 books including “Management Science”, “Project Management” and “Management of Information” published in Japan.

INDEX

A
asset maintenance, xi, 129, 131, 133, 135
algorithms
    classification, 10-12
    training, x, 23, 25, 33, 37-43
    Quasi-Newton, 29, 42
Attribute reduction matrix (ARM), 65-66

B
Bayesian Regulation, x, 26, 32, 34, 38-39

C
classification algorithm, 7-8, 10-12, 14
cloud computing, 137, 144-145, 147-148
clustering, x, 3-4, 48, 56, 58, 60-66, 75, 78-79, 81-88, 100-110
complaint handling, xi, 115-118, 123-125
Conjugate Gradient Algorithms, 28-30
Customer, Relationship Management (CRM), 48, 61, 66-67
    Complaint Management System (CCMS) 116,119

D
dashboard, xi, 78-79, 85, 89, 130-131, 133-135
data pre-processing, 5, 7

E
educational data mining, ix, 1-3, 5, 16
employment, xi, 73-81, 85- 89
exponential smoothing, xi, 23, 130, 132-135

F
filter feature selection, 6-9, 11-15
fog computing, 138, 144, 146-148
forecasting, x-xi, 23-27, 30, 34, 36, 40, 43
